Dear DEPRAG-INDUSTRIAL Associate,  
we take the opportunity to inform you about new and improved products that were either added to our product line or where we made improvements. Detailed technical information and pictures, as well as a catalog in PDF-format can be found on our website [www.deprag.cz](http://www.deprag.cz).

## Novinky:

- The cutting inserts with replaceable cutting plates

## The cutting inserts with replaceable cutting plates

The cutting inserts with replaceable cutting plates are well-suited for the cutting of materials with a tensile strength of 1,200N/mm<sup>2</sup> (corded wire, screws, etc.). One advantage is the possibility to replace the cutting plates when they are worn out (the holder is reusable), and part I45C00S7 even allows the operator to turn the cutting plate, which extends the plier usage.

The turnable cutting plates are made from steel and feature a high durability.

All of the listed cutting-inserts are intended for their use with our size 45 pliers, model no's: P0452X-C00, P0452Z-C00 und P0453-C00.
