- **Since 1998, DEPRAG CZ a.s. in Lázně Bělohrad is a daughter company of DEPRAG SCHULZ GMBH u. CO. Amberg, a worldwide leader in the production of air-operated tools, screwdriving- and assembly equipment, as well as automation.**

Our Products - Tools and solutions from a specialist

We provide superior technology in all product areas. Our screwdriving technology solutions benefit from the extreme torque accuracy of our shut-off clutch and the renowned robust and reliable design of all our screwdrivers. Screwdriving perfection is our guiding principle and we command undisputed market leadership in many applications.

Our experience in assembly technology has enabled us to develop first-class solutions. Countless DEPRAG products, such as measuring instruments, controllers and in particular the successful feeding technology, are utilised in our customers' applications. In conjunction with the long-standing experience of our project engineers, we produce assembly machines for a wide variety of client requirements.

Today as ever, air motors are of utmost importance as a drive element for machines and equipment. As market leader in this field we provide an extremely versatile programme for the most varied of applications from the food industry to medical technology.

Professional industrial tools such as grinding and polishing machines, drills, hammers, pliers and sheet metal tools are the roots of our company. High performance, reliability and outstanding ergonomic design are the distinguishing characteristics of DEPRAG INDUSTRIAL tools.

ISO 9001 BUREAU VERITAS Certification

Top Rating® DEPRAG CZ a.s. DUNS 64-388-7904, IČ 00169668

- **Since March 12, 2004, DEPRAG CZ is ISO 9001 certified.**
- **We utilize the most modern production machinery and continuously expand the education of our employees, which results in improved product quality.**
- **Our main objective is to offer solutions to our customers.**
- **Our customers can expect outstanding product quality, precision and longevity.**

DEPRAG CZ a.s. is an innovative manufacturer of professional industrial tools such as grinders, drills, tappers, hammers, needle scalers, pliers, sheet metal tools, ATEX-certified tools for use in potentially explosive environments and other air tools.
As an industrial user you require excellence in the air tools you use. DEPRAG CZ a.s. offers classic air tools under the brand name DEPRAG INDUSTRIAL for almost any application case. Some of the applications can be found for example in the mining, oil- and gas industry, foundries, automotive industry, machine building, steel industry, ship building or in the aviation industry.
DEPRAG CZ a.s. carries specially adapted tools that perfectly fit your particular application and that are part of our standard assortment. Please contact one of our product specialists if you require help in finding a suitable tool.

ADAPTIVE DGS

Deprag Grinding System

Intuitive and adaptive robotic grinding

RMA070-190B

Model	Part No.	Max. power output W	Speed (no load) min^{-1}	Grinding disc-Ø mm	Weight - head kg	Total weight with the extension kg
Axial robotic grinding head is for equipped for subsequent connection to the selected industrial robot.						
RMA070-190B	6061371A	700	19 000	75	4,4	5,9
Air stationary grinder is designed as customer-specific solution for the subsequent connection with the industrial robot for use in mass production.						
MA070-153V/S1	6061302A	700	15 300	100	5,5	12,9

Specifications at 90 psi (6,3 bar)

MA 070-153V/S1

The specially designed DEPRAG Industrial tool head is suitable for the connection to industrial robot for the application of the grinding or polishing of flat or curved surfaces. In the connection with the fiber discs or grinding inserts can be used for grinding of the castings or welded parts in automotive industry, foundries, furniture parts production etc. The tool head is well suited for the stationary grinding and for assembly with other product.

END-OF ARM-TOOLING FOR GRINDING AND POLISHING

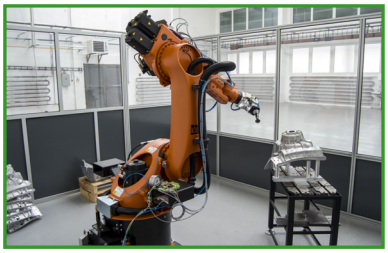
End-of Arm-Tooling for Grinding and Polishing

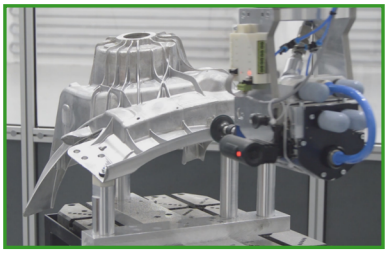
Would you like to increase the efficiency and productivity of your production?
Do you have a high waste rate in your production?
Are you thinking about installing a robot to your production in order to lower your costs?

DEPRAG CZ a.s offers:
- independent consultation in your facilities and evaluation of the possibility to use an industrial robot for grinding and polishing applications
- price quotation including a 3-D model
- selection and testing of all components for optimum grinding or polishing results
- complete engineering services incl. design, production, assembly and integration to your production process

DEPRAG CZ a.s. - Your Partner for Grinding Technology

Automotive Industry / Machine Building / Foundries / Aircraft Industry / Building Industry / Glass Industry / Food Industry / Medical Technology etc.





10 Good Reasons to Invest in Robots

- Reduced operating costs
- Improved product quality and consistency
- Improved quality of work for employees
- Increased production output rates
- Increased product manufacturing flexibility
- Reduced waste and increased yield
- Improved workplace health and safety
- Reduced turnover and recruitment difficulty
- Reduced capital costs
- Save space in manufacturing areas

Air-Operated Angle Grinders DIQ

GAQ 823-250BX

The developments of the 4th Industrial Revolution, **Industry 4.0 / Smart Factory**, now also applies to some of the **DEPRAG INDUSTRIAL air-grinders**. Those grinders are equipped with the revolutionary DIQ-technology that allows to continuously evaluate the current **operating conditions of the tool!**

All data is acquired during the actual work flow; **it is continuously evaluated and stored on the web.**

By utilizing a special IQRF Network - it operates in the frequency range of 868 MHz - the acquired data is made available via wireless output. The transfer takes place by a **Gateway** into the **LAN/Internet** and the data is stored in the **DEPRAG Cloud.**

- **Access to technical documentation**
- **The tool and the operating process is continuously supervised**
- **Optimal use of the tool to achieve maximum effectiveness**
- **Possibility to obtain recommendations for best-suitable tool fitting any given application**
- **Compare different tools and/or operators**
- **Access data about air-consumption for improved production planning**
- **Optimization and effectiveness recommendation (for example grinding speed, tool load)**
- **Exact control of the service intervals; overview of individual repair expenditures**
- **Uptime of the tool**
- **Energy-saving = cost-saving**

ACCESSORIES

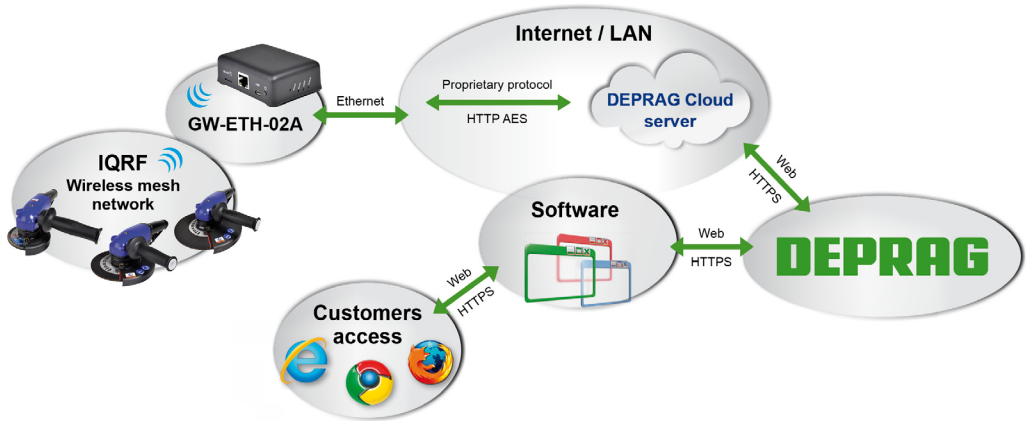
Internet

Software packages

Gateway

Protective cover

The principle of the data transfer, including communication:



Thanks to the DIQ-technology, important and clear operational information is obtained, which is necessary for the optimization of the production process and the increase of its effectiveness. Lowering production-cost is crucial in this day and age, not only for the price of a product, but also for the profitability of a manufacturer.

Current and detailed information about our newly developed DIQ technology, software-application and DIQ angle grinders may be found our catalogs DCZ 10323, as well as on our website www.deprag.cz.

DIE GRINDERS - Inline Design, Power Output 90 - 300 W (.12 - .4 HP)

		kW (hp)	min^{-1} (rpm)	mm (in)	kg (lbs)	mm (in)	mm (in)	mm
90 W (.12 hp)								
Grinding and milling at actual speed of 100.000 rpm. This ergonomic miniature grinder allows easy and optimum access on hard-to-reach areas. The high run-out accuracy of the collets assure a high durability, an optimum material removal, and a high surface quality during grinding or milling. This grinder operates at an extreme low vibration. Oilfree operation without loss of power is possible.								
GDS009-1000BY	3146441E	0,09 (.12)	100 000	4 (.16)	0,3 (.66)	5 (.20)	3 (.12)	3 [1 - 3,25]
110 - 150 W (.15 - .2 hp)								
Grinding, milling, fabricating of casted parts or when used for precision operations when polishing and deburring of welding seams, the use of these small and light-weight grinders simplify any fabricating job. Vane motor.								
GDS011-550BY	831050A	0,11 (.15)	55 000	5 (.20)	0,1 (.22)	10 (.39)	3 (.12)	3 [2; 3,25; 3/32; 1/8“]

250 W (.34 hp)								
Our turbine grinders operate oilfree. The low weight assures a fatigue-free operation. The inserted grinding tip or carbide cutter can be used with this pneumatic tool by using its full power and speed. These grinders are especially suited for the precision grinding and milling in the tool-, die-, and mold making- or in small industrial areas. An integrated, automatic brake (Model GDST 025-700BY) eliminates any trailing of the grinding spindle. The type GDST 025-700BYO ist without brake. Integrated speed regulator. Lower levels of vibration- and noise emissions compared to standard air-grinders. Your advantage: Extreme low air consumption.								
GDST025-700BY	6060839A	0,25 (.34)	70 000	6 (.24)	0,3 (.66)	13 (.51)	6 (.24)	3; 6 [4; 5; 1/8“; 3/16“; 1/4“]
GDST025-700BYO	6060857A	0,25 (.34)	70 000	6 (.24)	0,3 (.66)	13 (.51)	6 (.24)	3; 6 [4; 5; 1/8“; 3/16“; 1/4“]
270 W (.36 hp)								
Small grinders for the precision grinding and milling. Ergonomical, low-weight and suitable for numerous application cases - in the tool-, die-, and mold making- or in small industrial areas. Air-exhaust located on the rear and/or partial frontal exhaust. Vane motor.								
GDS027-320BX	3148457D	0,27 (.36)	32 000	6 (.24)	0,4 (.88)	25 (.98)	10 (.39)	6 [3; 4; 5; 6; 1/8“; 1/4“]
GDS027-320BY	3148457C	0,27 (.36)	32 000	6 (.24)	0,4 (.88)	25 (.98)	10 (.39)	6 [3; 4; 5; 6; 1/8“; 1/4“]

300 W (.4 hp)								
For the manual, peripheral- and transverse grinding with grinding tips and when fabricating with carbide cutters. Especially well-suited for the grinding in cavities and hard-to-reach casted areas, these grinders are equipped with a reduced shank (execution V). The centrifugal speed- regulator reduces a speed overload and assures an economical operation (Models GDS 030-120/150/200/230-BX/BY, VX/VY). Vane motor.

350 W (.47 hp)								
The ergonomic design of our powerful grinder allows the low-fatique operation in industrial areas. These tools are equipped with gears that allow the perfect operating speed for excellent grinding results. Especially when used with carbide cutters or with wire brushes, this tool performs exceptionally well. Vane motor.

500 W (.67 hp)								
For the optimum grinding with grinding tips or for the fabricating with carbide cutters. This tool series features a small grip-diameter, a collet with connector nut for an improved clamping force. Our grinders are equipped with an integrated speed-regulator, that holds the speed of the tool constant, even when tool is operated at full load. Cold-isolated housing. Vane motor.

Our turbine grinders operate oilfree and are therefore practically maintenance free. Optimum fabrication results. Due to the high speed, these tools are especially well-suited to the use with carbide cutters in foundries, in the entire mechanical engineering industry, the tool- and die industry. The low weight assures a fatique-free effort. Includes a speed regulator. Lower levels of vibration- and noise emissions compared to standard air-grinders. Your advantage: Extreme low air consumption.

Our grinders fulfill all requirements for an optimum fabrication. Our product line includes grinders that are especially designed for heavy-dutyoperations or with reduced speed. Our grinders are equipped with a integrated speed regulator, that holds the speed of the tool constant, even when tool is operated at full load. Extensive varieties that are suitable for all industrial areas (foundries, automotive industry,etc.). The grinders that feature an extended spindle, are ideal for the cleaning of pipes and the grinding in hard-to reach areas. Cold-insolated housing.Vane motor.

1 000 W (1.34 hp)								
Our turbine grinders operate oilfree and are therefore practically maintenance free. Grinding and milling in almost every industrial area. The low weight assures a fatique-free effort. An integrated, automatic brake eliminates any trailing of the grinding spindle. Integrated speed regulator. Lower levels of vibration- and noise emissions compared to standard air-grinders. Especially well suited for the use with steel-disks. Your advantage: Extreme low air consumption.								
GDST100-280BX	6061137A	1 (1.34)	28 000	13 (.51)	1,9 (4.19)	32 (1.26)	16 (.63)	6 [3;4;5;8;9;3/16";5/16";1/4"]
Our powerful die-grinders are designed to fulfill the highest quality demands when they are used on industrial applications - in foundries, in the tool- and die making industry or in the precision fabrication industry. These grinders are well-suited for the deburring/polishing of welding seems and for the processing of casted parts. The grinders that feature an extended spindle, are ideal for the cleaning of pipes and for the grinding in hard-to-reach areas. Please Note: When using these grinders for pipe-cleaning, attach lamellar sanding discs or wire brushes only! With an integrated speed regulator, that holds the speed of the tool constant, even when tool is operated at full load. Cold-insolated housing. Vane motor.

1 200 W (1.61 hp)								
The robust construction of this grinder assures a high lifespan even when used in a 24/7 operation. An operator is able to work fatigue-free with this powerful air tool. The grinder is preferably used with grinding tips or carbide cutters for the treatment of plastics and metals in foundries, in the mold-making- and fixture-building industries and wherever precision fabrication is needed for de-burring, for the polishing of welding seems and for the processing of casted parts. The grinder incorporates a fast-acting speed regulator, which keeps the tools' speed constant even when operated at full load. The speed-regulator allows the adjustment of the peripheral speed; this allows the maximum speed potential to be used for any given application. This grinder operates at an extreme low noise level and keeps its operating vibration to a minimum. The previous, overhauled model no. PBK 75X was renamed the GDS 120 and is one of the best-selling DEPRAG INDUSTRIAL grinders. Vane motor.

600 W (.80 hp)								
This grinder has been especially designed for the grinding (or sharpening) of drill-crowns. For the carbide sharpening of the drill-crowns, we recommend the use of a round, diamond grinding-tip with a max. OD of 20 mm (.79 in) and a shaft-diameter of 8 mm (.31 in). An air- and water cooling system (optional accessories) reduces the wear and tear of the drill-crowns. Vane motor.

700 W (.94 hp)								
Optimum fabrication results in all industrial areas. Ideal because of the angle-head, this tool accesses hard-to-reach areas, such as when processing molds and for the cutting of castings or fixtures. This tool is suitable for the fabricating of both metals and plastics. Our grinders are equipped with a speed-regulator, that holds the speed of the tool constant, even when tool is operated at full load. Vane motor.

STRAIGHT GRINDERS - Power Output 1,1 - 2,8 kW (1.48 - 3.75 HP)

Straight grinders
- for the fabrications on steel, for the deburring of welding-, casting-, and ridge-seams (with grinding disks)
- for the removal of rust, the descaling of rolled steel and forgings (with steel brushes)

Model	Part No.	Power output	Speed (no load)	I.D. of air inlet hose	Weight without air connection	Max. radial speed	For grinding disk		
							External/internal diameter	Width	Type
		kW (hp)	min^{-1} (rpm)	mm (in)	kg (lbs)	m/s (ft/s)	mm (in)	mm (in)	
Our straight grinders are designed for the use with grinding disks when heavy-duty fabrication is required on steel and castings and for the deburring of welding-, casting-, and ridge-seams. They can also be used with steel brushes for the removal of rust, the de-scaling of rolled steel and forgings. The integrated speed regulator keeps the speed nearly constant and also reduces the air consumption. Vane motor.

Our turbine grinders are used with flat grinding disks, wherever heavy-duty fabrication is required on steel and castings or when deburring welding-, casting-, and ridge-seams. It has never been easier to perform smooth or coarse grinding of steel & cast iron (grey, formable etc.) in foundries, or when polishing welding seams or when fabricating casted parts. Your Advantages: High power output at a low weight, max. material removal, low air consumption, oilfree and maintenance-free operation, turbine motor does not require airline lubrication. Efficiency, ergonomic - perfect handling due to the grip and ergonomic form, the handle allows a rotation of 90°, easy access to the screen, turnable ring for air exhaust, machine automatically shuts-off at overload, integrated speed regulator. On special request we can offer customized grinding disks to fit your exact application.

Specifications at 90 psi (6,3 bar).

GS508-120BX

GS818-210BX

GST823-280BXE

GST 815-220BXO

Turbine grinders and Tyrolit-grinding disks for grinding of steel & cast iron (grey, formable etc.) = high power output at a low weight, max. material removal, efficiency and high longspan

GST508-120BX

Advantages
- for industrial applications
- optimum power-to-weight ratio
- highly durable
- robust
- efficient
- simple operation

ANGLE GRINDERS - Without Gearing, for Grinding Disks with a Diameter of 115 - 230 mm

Angle grinders with direct drive - for the scrubbing and leveling of cast-iron parts, steel parts, welding seams, non-ferrous metals of all types and rock, as well as for any other fabrication areas, such as the steel- and container construction, for machine building, in foundries and concrete construction

PBU115C-80Z

Angle grinders DEPRAG INDUSTRIAL with dust extraction
- efficient extraction at the place where dust is generated
The result: a clean working environment and best view of your work piece.

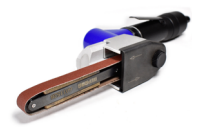
Dust extraction guard for angle grinders

GAT818-190BX

Advantages
- for industrial applications
- high power
- highly durable
- efficient
- ergonomic
- for an oilfree operation, we offer our special line of turbine grinders

BELT SANDERS - Power Output 300 W, 500 W (.4, .67 HP)

Belt sanders
- for the grinding, smoothening and polishing of even and curved surfaces, for the bevelling of edges and the fabricating of steel, stainless-steel, brass, bronze-casting, aluminum parts, etc.



GB050-025BX

Model	Part No.	Power output kW (hp)	Speed (no load) min^{-1} (rpm)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)	Radial speed of grinding belt m/s (ft/s)	Dimensions of grinding belt mm (in)
300 W (.4 hp)							
Our belt-sanders are well suited for the grinding and polishing of even and curved surfaces. Basic design or design with exhaust hose. Can even be operated as a grinders with collet. Vane motor.							
GB030-013BX	830498A	0,3 (.4)	30 000	6 (.24)	0,9 (1.98)	28 (91.84)	13 x 305 (.51 x 12.01)

Specifications at 90 psi (6,3 bar).

Contact Arms for Belt Sanders

DEPRAG CZ a.s. offer contact arms for belt sanders in different designs, shapes, sizes and materials - made for your application.

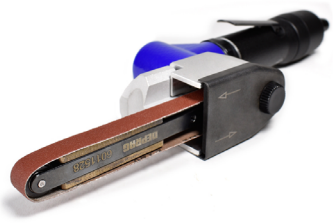
We produce contact wheels for our belt sanders with different materials - e.g. polyurethan, steel, bronze, brass etc., with different diameter from 8 mm (5/16") to 25 mm (1"), and width from 8 mm (5/16") to 26 mm (1-1/32").

The application range of the belt grinders is almost unlimited, due to many different contact arms that we offer. The grinders can be used for standard vertical or horizontal grinding of edges and pipes. Different size of contact wheels and thin arms allow grinding of places with limited access or inside holes. Contact arms with belt support are used on flat surfaces and arms without support are more suitable for finishing of round surfaces.

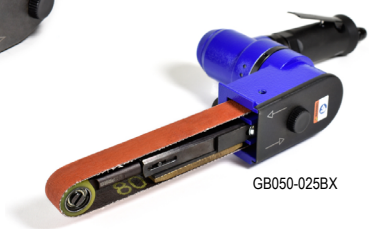
According to the requirement, we offer belts with different width from 3,5 mm (9/64") to 25 mm (1") and lengths from 305 mm (12") to 510 mm (20").

The specialized construction of the contact-arms allows the efficient grinding, even in tight quarters. The contact-arms are efficiently connected to the motor of the belt-sander by a contact-wheel.

Advantages:
- for industrial applications
- high power-output
- highly durable
- operates in hard-to reach areas
- grinding of plain or curved surfaces



GB030-013BX



GB050-025BX

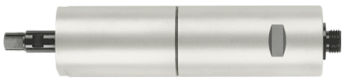
AIR VANE MOTORS FOR SPECIAL APPLICATIONS - ready for integration into your machine

DEPRAG has a wide range of air vane motors designed for special applications and available for grinding, milling and drilling.

Grinding motors

The DEPRAG grinding motor program benefits from decades of experience with the tried and tested DEPRAG handheld pneumatic grinders. The robust steel housing guarantees high accuracy and operational reliability. Furthermore, the grinding spindle features extreme precise collets for various shaft dia- meters and assure a high run-out accuracy.

Available power ranges: 150 W - 1.000 W (.2 -1.34 HP)
Speed (no load): 15.300 - 47.000 rpm (made to suit your individual application)



Actual and detailed information, showing the complete product line of DEPRAG air vane motors for grinding, may be found on our web side www.deprag.com or in our catalog D 6800. Please contact our product specialist if you cannot find a suitable tool.

Stationary grinders DEPRAG INDUSTRIAL

Specifications at 90 psi (6,3 bar).
* We offer also other collet sizes.

Milling motors

The durable milling motors with a superior run-out precision, are the first choice for robotic applications since they are small in size but powerful and offer a vast speed range.

Available power classes: 400 W (.5 HP)
Speed (no load): max. 20.000 rpm (according to your individual application)

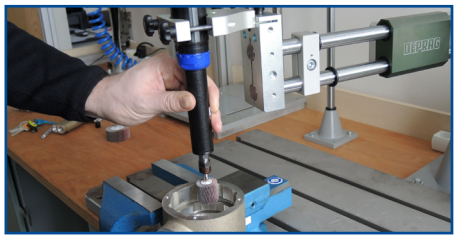
Actual and detailed information, showing the complete product line of DEPRAG air vane motors for milling, may be found on our web side www.deprag.com or in our catalog D 6800. Please contact our product specialist if you cannot find a suitable tool.

Drilling motors

Drill motors in slim design allow narrow hole spacing for multiple spindle-units as required for window manufacturing.

Available power classes: 80 W - 600 W (.1 - .8 HP)
Speed (no load): 150 - 24.000 rpm

Actual and detailed information, showing the complete product line of DEPRAG air vane motors for drilling, may be found on our web side www.deprag.com or in our catalog D 6800. Please contact our product specialist if you cannot find a suitable tool.



Advantages

- A wide range of our air vane motors for grinding, milling and drilling in a standard assortment.
- robust
- highly durable
- high power output

POLISHERS - Pistol-Grip / Angle-head Design

Polishers - pistolgrip - for a fine-precision polishing or for the heavy-duty de-rusting of metal, for the removal of paint layers, or even the coarse grinding of cast-iron or wood by using fiber disks

PLU50A-55ZK

PLU180D-80X

Angle polishers, with gear

- For the polishing of casted parts, welding seams and other materials using vulcan fiber disks, or for the polishing of car bodies after welding in the automotive industry, for the best-possible polishing results even on hard-to-reach areas
- Model PLP - safety lever, with extended spindle (design A) or without extended spindle (design B)
- Model PA 070 - twist valve, double insulated housing for noise reduction and low vibration
- With integrated speed regulator
- Vane motor

PLP180A-40X	6060663A	0,7 (.94)	4 000	180 (7.09)	10 (.39)	2,4 (5.29)	M14

PLP180A-40X

Angle turbine polisher, with gear
- DOUBLE THE POWER! HALF THE WEIGHT!

- For the polishing of casted parts, welding seams and other materials using vulcan fiber disks
- Oilfree and maintenance-free operation, exchange of vanes is not needed. Turbine motor does not require airline lubrication. Optimal power to weight ratio, low air consumption
- Perfect handling by means of an anti-vibration side handle and ergonomic shape, change-over to left-handed operation possible.
- High operating safety machine automatically shuts-off at overload - machine incorporates a safety lever and an integrated contact-protection that avoids the inadvertent contact of the grinding disk by the operator, which eliminates any subsequent injury.
- With integrated speed regulator

PAT260-085BX	310687G	2,6 (3.5)	8 500	180 (7.09)	13 (.51)	2,2 (4.85)	M14

Specifications at 90 psi (6,3 bar).

Excentric orbital polisher - for precision and demanding polishing in the automotive industry. This polisher is intended for the use with emery wheels (with Velcro), fabric wheels and polishing wheels.

Model	Part No.	Power output kW (hp)	Speed (no load) min^{-1} (rpm)	Ø of emery wheel - min./max. mm (in)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)	Spindle thread
Excentric polisher • For the exact, upscale polishing in applications, such as in the automotive industry, for polishing with fiber disks, buffing disks or for sanding using emery disks and velcro closures • Safety lever • With integrated speed regulator • Vane motor

Specifications at 90 psi (6,3 bar).

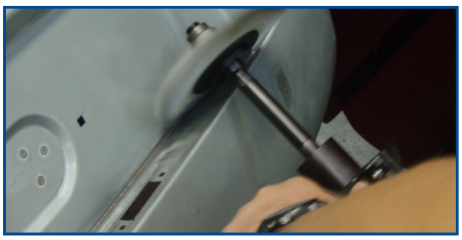
PAE020-120BX



Advantages:

- for industrial applications
- highest power output at a low weight
- efficient and economical
- ergonomic
- highly durable
- simple operation

DRILLS - Inline Design, Power Output 120 - 310 W (.16 - 4.16 HP)

Drills - inline design - for the drilling of different materials in the aviation- and automotive industry as well as the machine building industry

DS012-005PC

Model	Part No.	Power output kW (hp)	Speed (no load) min^{-1} (rpm)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)	Rated torque Nm	Max. Ø of drill bit mm (in)	Collet - clamping range Collet - standard equipment [optional accessories] mm
120 W (.16 hp)								
Drill with collet (deburrer) - for vertical applications, push tu start, collets with M12x1, clamping diameter of 3 - 9,5 mm, deburring of holes up to 15-mm diameter, with commonly available burrs (90°). Spindle-lock for the simple locking and loosening of the drill bit. Rated torque 4,5 Nm. With gears for the best operating speed and superior drilling results.

Model	Part No.	Power output kW (hp)	Speed (no load) min^{-1} (rpm)	Drilling into steel to mm (in)	Reaming up to mm (in)	Tapping into steel to mm (in)	Milling of pipes mm (in)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)	MORSE taper
Drills with MORSE taper for drilling, reaming and counter-sinking operations in tight access areas. When using these drills with the optional available grip-tube, these drills may also be used as a universal drill with equally beneficial results. All angle-drills are equipped with a feedspindle that is also used for the removal of the drill bit. As an optional feature, we can offer the models DA 150 to DA 220 with a ratchet instead of the pilot-wheel. For extreme tight access areas, we offer reduced profile drill designs, without feed-spindle or pilot-wheel. All models of the design DA 150 to DA 220 are additionally equipped with a speed-regulator, which helps to reduce the air consumption when idling.

Robust drills with pistolgrip for the manual drilling into metal, wood, plastics and other materials. These drills are available in two different designs, offering the best-possible handling - with offset handle design for pressure into the drill-axis mainly used for horizontal applications (type DP 040-...) or with pistolgrip design to absorb a higher torque (type DP 017-...). Drills of type PV...H - with combined air-and exhaust hose - best suited in areas where there is a dusty environment and where a clean environment is desired. Many drills allow for right - or left location through a reversible motor.

* Reduction of free speed by 25% possible

Specifications at 90 psi (6,3 bar).

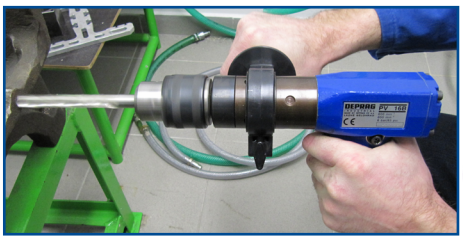
1) The drill is equipped with a quick-change drill chuck (capacity 0 - 6,5 mm)

2) The drill is equipped with a quick-change drill chuck (capacity 0 - 8 mm)

Remark: Q - quick change chuck

Advantages:

- for industrial applications
- optimum power-to weight ratio
- ergonomic
- simple operation
- reversible



DP029-015ZPB12

DP040-005ZB16

TAPPERS - Inline Design / Pistol-Grip, Power Output 150 - 700 W (.20 - .94 HP)

Tappers - for the tapping of threads, as well as the cleaning of threads in materials such as steel, aluminum and other alloys for applications in the automotive- and machine building industries.
The tappers are equipped with a flexible chuck that perfectly guides the tap-insert and cuts a straight thread, even if the tapper is held at a slight angle.

Model	Part No.	Power output	Speed (no load) rechts	Speed (no load) links	Tapping into steel	Tapping into alu	I.D. of air inlet hose	Weight without air connection	Tap holder capacity	Taper DIN 238
		kW (hp)	min^{-1} (rpm)	min^{-1} (rpm)	mm	mm	mm (in)	kg (lbs)	mm	mm
Tappers - inline design										
• Start and reverse by toggle lever or dual-trigger										
• For right / left thread cutting, suitable for cutting of blind hole (optional accessories)										
• The reverse trigger is activated by push-pull at almost double the speed										
• Ideal tools for vertical applications										
• The exchange of the tap-insert is easily done by a quick-change chuck.

Specifications at 90 psi (6,3 bar).

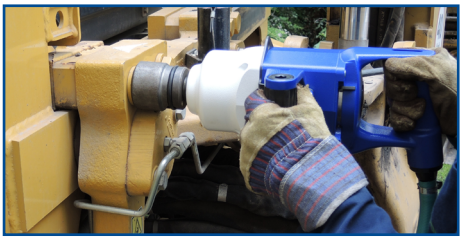
3-step torque adjustment

Our impact tools are equipped with a 3-level power limiter, where the first setting is the max.torque, the second setting reduces the torque to 50% and the third setting corresponds to 30% of the max. torque.



SMP085-1/2"ZA

Advantages - impact tools:

- for industrial applications
- high power (TwinHammer impact mechanism, revolutionary motor design)
- ergonomic execution
- efficient
- 3-step torque adjustment
- low weight
- low vibration and emission level
- maximum life-time and reliability

We offer all kinds of air tools for quarries, construction and foundries. Select the most suitable hammer in accordance with the necessary application:

- Chisel and demolition work, jointing, plastering
- Cleaning of casted parts, removal of cast-on sections
- Removal of rust on large areas
- Crushing of semi-solid and loose materials, such as concrete, pavement, stonework, etc.
- Stamping of formed and bulk materials, such as used in the mold and cast industry
- Simple and complicated demolition, caulking, trimming, breaking, removal of plaster and different kinds of floor coverings, for the removal of casting flash

Advantages: ■ for industrial applications ■ highly durable ■ simple operation ■ robust

Chipping hammers - for light breaking through walls, for demolition, mortising, removal of plaster, as well as for cleaning of castings and for the detaching of cast-sections, the smaller hammers are primarily used in the die casting-, container construction-, ship building-, bridge-, aviation- and construction industry, as well as in foundries and welding shops

Riveting hammers - for rivet busting and rivet-removal in the steel-construction, in boilers, containers and on ships.

Model	Part No.	Type of chisel shank	Impacts	Rivet-Ø - alu	Rivet-Ø - steel	I.D. of air inlet hose	Weight without air connection
		mm	min^{-1} (rpm)	mm (in)	mm (in)	mm (in)	kg (lbs)
Chipping and riveting hammers, with protection cap							
Our hammers are used in the die casting-, container construction, ship building-, bridge- and construction industry, as well as in foundries and welding shops, and for rivet busting and rivet-removal in the steel-construction, in boiler, containers and on ships etc.							
With pistolgrip

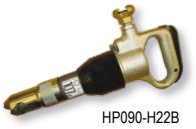
HAMMERS - Pick Hammers, Spade (breaking) Hammers, Impact Hammers, Scaler

Pick hammers - with drill-, or flat chisels to demolish stonework and concrete, for the use in road-construction and tunneling, as well as in mining



HP090-H22B

Model	Part No.	Type of chisel shank mm	Impacts min^{-1} (rpm)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Pick hammers - due to the weight of these hammers, it is possible to work in a vertical- or inclined plane - in quarries and in the building industry					
HP090-R25B	6060011A	Ø 25x75	1 590	16 (.63)	9,0 (19.84)
HP090-H22B	6060012A	hex. 22x82	1 590	16 (.63)	9,0 (19.84)
HP100-H22B	6060013A	hex. 22x82	1 590	16 (.63)	9,0 (19.84)
HP100-R25V	6060014A	Ø 25x75	2 040	16 (.63)	10,0 (22.05)
HP101-R25B	2501841A	Ø 25x75	1 200	16 (.63)	10,3 (22.71)
HP101-R25D	2501841B	Ø 25x75	1 200	16 (.63)	10,3 (22.71)
HP120-R25V	6060015A	Ø 25x75	1 260	16 (.63)	12,0 (26.46)
HP130-R25B	6060016A	Ø 25x75	1 260	16 (.63)	13,0 (28.67)

Specifications at 90 psi (6,3 bar).

Spade (breaking) hammers - with drill-, or flat chisels to demolish stonework and concrete, for the use in road-construction and tunneling, as well as in mining, when using the hammers with a spade, they are best suited for heavy excavations, rubble-removal, asphalt demolishing or to dig ditches

HB150-H22V

Model	Part No.	Type of chisel shank mm	Impacts min^{-1} (rpm)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Spade (breaking) hammers - due to the weight of these hammers, it is possible to work in a vertical- or inclined plane - in quarries and in the building industry					
HB150-H22V	6060017A	hex. 22x82	1 080	16 (.63)	15,0 (33.07)
HB200-H25V	6061028A	hex. 25x108	1 200	16 - 20 (.63 - .79)	20,0 (44.09)
HB250-H25V	6061029A	hex. 25x108	1 440	16 - 20 (.63 - .79)	25,0 (55.12)
HB300-H32V	6060019A	hex. 32x160	1 320	16 (.63)	30,0 (66.14)

Specifications at 90 psi (6,3 bar).

Impact hammers - for the forming of materials, especially in the foundries and wherever bulk materials need to be compacted

HR085-R60V

HR042-MK2B

Model	Part No.	Impacts min^{-1} (rpm)	Piston stroke mm (in)	Piston-Ø mm (in)	MORSE taper	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Impact hammers with MORSE taper - The rammers are used in many applications, such as the scaling of forgings when used with tampered- or rubber butts, the cleaning of Open-Hearth- or Electric Ovens, for the compacting of concrete and dirt during construction, as well as for fabrication in the cement- and stone production. The light-weight rammer HR 042-MK2B is also well-suited for operation in the core production. The hammer HR 025-R40B is especially suitable for table-top operation or for small surfaces, e.g. for ramming small core boxes, etc. Other hammers are used for ramming mold materials and wherever loose materials is being processed. Your advantage of design V: Low vibrations.							
HR025-R40B	6060020A	1 200	80 (3.15)	20 (.63)	-	10 (.39)	2,5 (5.51)
HR085-R60V	6060021A	870	220 (8.67)	32 (1.26)	2	13 (.51)	8,5 (18.74)
HR105-R60V	6060022A	780	140 (5.51)	36 (1.42)	2	13 (.51)	10,5 (23.15)
HR042-MK2B	2701441A	850	120 (4.72)	28 (1.10)	2	13 (.51)	4,2 (9.26)
HR069-MK2B	2701091A	850	120 (4.72)	28 (1.10)	2	13 (.51)	6,9 (15.21)
HR093-MK2B	2701571A	650	160 (6.30)	32 (1.26)	2	13 (.51)	9,3 (20.50)

Specifications at 90 psi (6,3 bar).

Scaler - in construction areas, for light concrete breaking, de-calking, cutwork, removal of plaster and all kinds of floor coverings, but also for other areas, such as the de-barking of trees or removal of burrs and street asphalt

HS043-H19B

Model	Part No.	Type of chisel shank mm	Impacts min^{-1} (rpm)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Scaler - a wide range of applications on the basis of selected tools (e.g. light demolition works, grooving, punching, removal of chips in foundries, etc.)					
HS043-H19B	6060023A	hex. 19x50	2 700	13 (.51)	8,5 (18.74)

Specifications at 90 psi (6,3 bar).

NEEDLE SCALERS - Inline Design, Pistol-Grip

Needle scalers - for the removal of welding seems, for de-rusting of steel constructions and containers, for removal of paint and scale, for the cleaning of castings, for the cleaning of facades in construction and for the abrading of concrete

Model	Part No.	Needle quantity pcs	Needles dimensions mm (in)	Impacts min^{-1} (rpm)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Needle scaler - inline design • For light- and semi-heavy applications • For applications where a pistol grip cannot reach the location to be fabricated						
SN23	831125A	12	Ø 3x180 (Ø.12x7.09)	4 000	10 (.39)	2,4 (5.29)
Needle scalers with pistol grip • For material removal, de-rusting and for simple cleaning operations (type SN 10) • For semi-heavy operations (type SN 25) • For heavy-duty operations (type SN 30)						
SN10	831124A	29	Ø 2x150 (Ø.08x5.91)	4 000	10 (.39)	1,4 (3.09)
SN25	831126A	23	Ø 3x180 (Ø.12x7.09)	4 000	10 (.39)	2,7 (5.95)
SN30	831127A	28	Ø 3x180 (Ø.12x7.09)	4 500	10 (.39)	3,5 (7.72)

Specifications at 90 psi (6,3 bar).

SN23

SN25

SN30

Advantages:

- for industrial applications
- highly durable
- high power and low vibrations
- ergonomic

Metal shears - for the entire sheet-metal industry, for the processing of metals in the automotive-, container-, and shipbuilding industry, as well as in body shops. The shears can be used for either straightor curved incisions and are especially well-suited for the cutting of metal sheets and coils

S16-320Y

Model	Part No.	Power output kW (hp)	Max. metal thickness mm (in) Steel metal up to 400 N/mm²	Steel metal up to 600 N/mm²	Steel metal up to 800 N/mm²	Aluminium up to 250 N/mm²	Smallest cutting radius mm (in)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Metal shears - with a material cutting capacity up to 2,5 mm, twist valve, cutting of curved surfaces is possible, perfect cutting accuracy									
S16-320Y	3240971C	0,32 (.43)	1,6 (.06)	1,2 (.05)	1 (.04)	2 (.08)	15 (.59)	6 (.24)	1,6 (3.53)
S20-180Y	3388471A	0,32 (.43)	2 (.08)	1,6 (.06)	1,4 (.06)	2,5 (.10)	20 (.79)	6 (.24)	1,9 (4.19)

Specifications at 90 psi (6,3 bar).

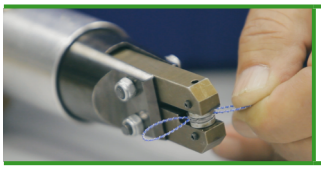
Advantages:
- high cutting speed
- optimum straight and curve workability
- no deforming of the cut material
- highly durable
- ergonomic

S20-180Y

PLIERS - for Cutting

Pneumatic pliers for the use of:

- Cutting Cu, Al, Ag, plastic materials (PVC, PF) and steel max. 400 N/mm²/ 25 long tons/sq.in
- Simultaneous cutting and wire-end flattening or
- Simultaneous cutting and 90°angle forming of wire ends of electronic components
- Pressing of cable joints
- Pliers are suited especially for the use in mass production, where a person can suffer sustained, long-lasting and monotonous stress in performing tasks such as assembling clips or cutting wires with manual tools. Such working conditions may result in RSI (repetitive strain injury). By replacing manual tools with our pneumatic pliers the workers will be protected against negative effects of mass production workplace.



Pliers for sealing and stamping seals

DEPRAG CZ a.s. offers air pliers for sealing and stamping seals.
For more information contact please our product specialists.

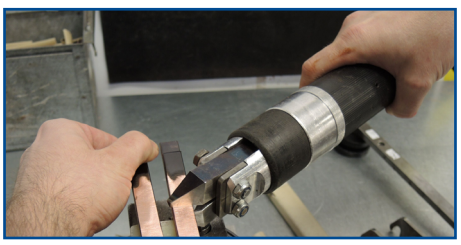
Pliers for cutting - for the industrial use for example in series production, in the automotive industry, in machine building industry, in the appliance industry as well as in maintenance and assembly departments

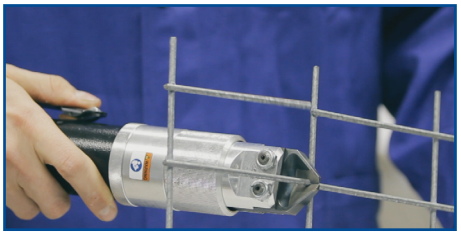
Model	Part No.	Pliers insert, mounted (optional accessories - see side 27)	Weight (without plier insert) kg (lbs)	I.D. of air inlet hose mm (in)
Pliers for cutting - with trigger and integrated lever-lock to avoid unintentional start • For the cutting of copper, aluminum, beryllium, silver, thermo/duroplast and steel • Special pliers for cutting as well as for other operations (e.g. wire-end flattening; 90°angle forming or wire ends of electronic components)				
P0181Z-C00	8076711A	no (plier insert I18.)	0,08 (.18)	6 (.24)
P0241Z-C00	8076721A	no (plier insert I24.)	0,15 (.33)	6 (.24)
P1361Z-C00	6061207A	no (plier insert I36.)	0,48 (1.06)	6 (.24)
P1362Z-C00	6061208A	no (plier insert I36.)	0,59 (1.30)	6 (.24)
P0452Z-C00	8076901A	no (plier insert I45.)	1,04 (2.29)	6 (.24)
Pliers for cutting, with safety lever, for heavy-duty applications - for increased longevity • For the cutting of copper, aluminum, beryllium, silver, thermo/duroplast and steel • Special pliers for cutting as well as for other operations (e.g. wire-end flattening; 90°angle forming or wire ends of electronic components)				
P0282X-C00	8249651A	no (plier insert I28.)	0,5 (1.10)	6 (.24)
P0283X-C00	8249651C	no (plier insert I28.)	0,6 (1.32)	6 (.24)
P0382X-C00	8272051A	no (plier insert I38.)	0,65 (1.43)	6 (.24)
P0383X-C00	6061225A	no (plier insert I38.)	0,8 (1.76)	6 (.24)
P0452X-C00	8258171B	no (plier insert I45.)	1,0 (2.20)	6 (.24)
P0453X-C00	8258171A	no (plier insert I45.)	1,15 (2.53)	6 (.24)

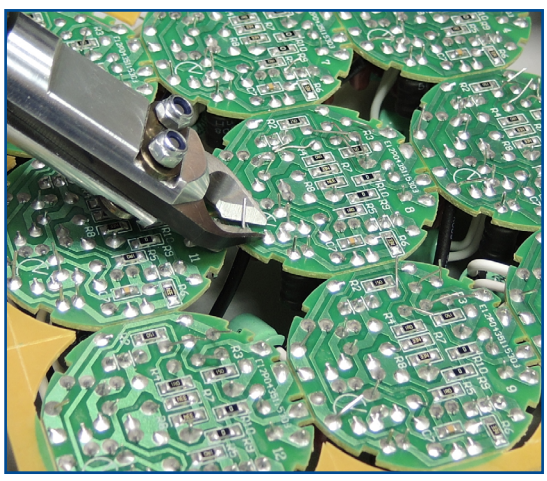
Specifications at 90 psi (6,3 bar).

P0241Z-C00

P0452Z-C00







P1361Z-C00

P0453X-C00

Advantages:

- high power, maximal cutting power up to 11 850 N
- simple operation
- highly durable
- pliers inserts are available in two executions

PLIER INSERTS for Cutting Pliers (Optional Accessories)

DEPRAG plier inserts are available with straight- or angled cutting blades. They can be designed for angled cuts or straight cuts and are even available as replaceable triangular cuts. To cut metals, one side of the insert is machined as an edge and the other is designed to be the counter-holder (the anvil). Synthetic materials require a different cutting technology: Both sides of the insert are designed with an edge.

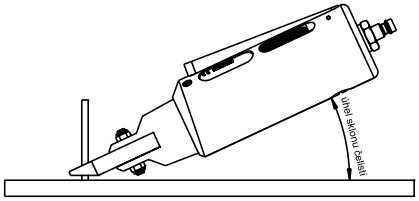
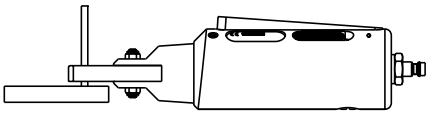
**) The stated value is just a theoretical figure, describing the max. diameter which can be inserted in the plier inserts. This value is derived from the geometrical dimensions and does not mean that the pliers are able to cut it. The max. cutting diameter depends on the material.

***) Cutting angle**

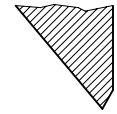
We offer other special custom-made plier inserts to fit your application.



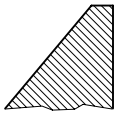


Cutting geometry

A

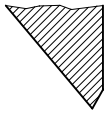


Application:
Plastics, copper, soft aluminium, small cross-sections, steel



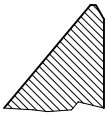
Characteristics:
Both jaw inserts made from hardened material, upper jaw has a sharp edge, lower jaw is flat (no edge)

B



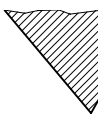
H2

Application:
Hard, reinforced plastics (GFK), steel (limited), reinforced cooper, larger cross-sections



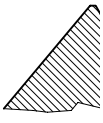
Characteristics:
Both jaw inserts made from hardened material, both jaws have an edge in V-form

C



HK2

Application:
Hard, reinforced plastics (GFK), reinforced copper, larger cross-sections, for flush cuts



Characteristics:
Both jaw inserts made from hardened material, both jaws have a sharp edge

PLIERS - for Mounting of CLIC-, Hose-, COBRA- or Spring Clamps

Pliers to mount clamps - for the industrial use for example in mass-production, in the automotive industry, in machine building industry, in the appliance industry as well as in maintenance and assembly departments

Model	Part No.	Width of clamp mm (in)	Insert opening, adjustable	Max. opening width mm (in)	Min. closing width mm (in)	Weight (with plier insert) kg (lbs)	I.D. of air inlet hose mm (in)
Pliers for CLIC-clamps • With safety lever • With integrated plier inserts							
P0383X-P00-I90CL06	8215721A	6 (.24)	yes	20 (.63)	2,5 (.10)	0,75 (1.65)	6 (.24)
P0383X-P00-I90CL08	8215721B	8 (.31)	yes	20 (.63)	2,5 (.10)	0,75 (1.65)	6 (.24)
Pliers for hose-clamps • With safety lever • With integrated plier inserts							
For hose clamps: dia. up to 50 mm (1.97 in)							
P0383X-S00-I90R08	8298331B	7,5 (.30)	yes	13 (.51)	0,8 (.03)	0,65 (1.43)	6 (.24)
P0384X-S00-I90R10	8298331C	10 (.39)	yes	13 (.51)	0,8 (.03)	0,75 (1.65)	6 (.24)
For hose clamps: dia. 50 mm up to 100 mm (dia. 1.97 in up to 3.94 in)							
P0451X-S00-I90R	8074721B	-	yes	12 (.47)	0,8 (.03)	1,0 (2.20)	6 (.24)
P0452X-S00-I90R	8074731A	-	yes	12 (.47)	0,8 (.03)	1,2 (2.65)	6 (.24)
Pliers for COBRA-clamps • With safety lever • With integrated plier inserts							
P0383X-P00-I90CO	6061212A	9 (.35)	yes	23 (.91)	6,5 (.26)	0,6 (1.32)	6 (.24)
Pliers for spring-clamps • With safety lever • With integrated plier inserts							
For spring clamps: dia. up to 50 mm (1.97 in)							
P0383X-P00-IFE	8247811A	-	yes	62 (2.44)	5 (.20)	0,75 (1.65)	6 (.24)
For spring clamps: dia. 50 mm up to 100 mm (dia. 1.97 in up to 3.94 in)							
P0452X-P00-IFE	8074741A	-	yes	70 (2.80)	5 (.20)	1,25 (2.76)	6 (.24)

Specifications at 90 psi (6,3 bar).

P0383X-P00-I90CL08

P 0383X-S00-I90R08

P 0383X-P00-I90C0

P0383X-P00-IFE

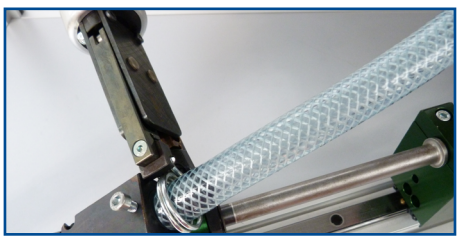
Clamps:

CLIC-clamp 

Hose-clamp 

COBRA-clamp 

Spring-clamp 



P0383-P00-I90CO

P0383X-P00-IFE

Advantages:

- high power, maximal squeeze force up to 4 500 N
- simple operation
- highly durable

Jig Saws - for hand-guided cutting of different materials, especially metals and plastics e.g. in the machine building or in the wood-fabricating industry

PPP35AX

Model	Part No.	Power output kW (hp)	Strokes per min. (no load) min^{-1} (rpm)	Stroke of saw blade mm (in)	Max. length of saw blade mm (in)	Dimensions of saw blade (standard equipment) mm (in)	I.D. of air inlet hose mm (in)	Weight (without clamping device) kg (lbs)
Jig saw - for cutting of metal- and plastic components • For the cutting of supports, pipes, cables • The saw can be equipped with an integrated clamping device which allows deeper cutting - up to 300 mm (11.81 in). • Integrated speed regulator assures perfect and constant cutting conditions								
PPP35AX	830503A	1,1 (1.48)	380	68 (2.68)	350 (13.78)	300x27x1,6 (11.81x1.06x.06)	19 (.75)	9,0 (19.84)

Specifications at 90 psi (6,3 bar).

SS150-280BX

Model	Part No.	Power output kW (hp)		Strokes per min. (no load)	Stroke of saw blade	Max. length of saw blade	Dimensions of saw blade (standard equipment)	I.D. of air inlet hose	Weight (without clamping device)
		air pressure 65 psi (4,5 bar)	air pressure 90 psi (6,3 bar)	min^{-1} (rpm)	mm (in)	mm (in)	mm (in)	mm (in)	kg (lbs)
Jig saw - for cutting in potentially explosive environments • All-metal jig saw primarily for use in potentially explosion hazardous environments (mining) • The saw can be equipped with an integrated clamping device which allows deeper cutting - up to 300 mm (11.81 in). • Integrated speed regulator assures perfect and constant cutting conditions									
SS150-280BX	6060835A	0,9 (1.21)	1,5 (2.01)	280 *)	68 (2.68)	400 (15.75)	300x27x1,6 (11.81x1.06x.06)	19 (.75)	10,8 (23.81)

*) Recommended number of cycles for cutting of steel of class 11 with cutting speed 27 m/min: 200 min-1.
Specifications at 90 psi (6,3 bar).

Chain saw - for the cutting of different materials for varying applications in heavy-duty 24/7 industrial operations, such as the machine building- or in the wood-fabricating industry; the saw can also be used in explosion hazardous environments

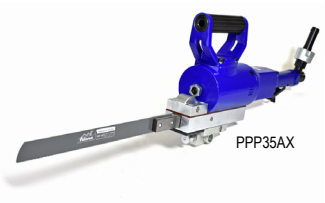
SH150-180BX

Model	Part No.	Power output kW (hp)	Speed (no load) min^{-1} (rpm)	Max. length of chain bar mm (in)	Max. cutting diameter mm (in)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Chain saw - ATEX-compliant IM2cXIIGcIIBT4 (130°C) X • Chain saw - for a 24/7 operation in both industrial- and manual operations, such as machine building, the wood-fabricating industry and even for the use in potentially explosive environments • High power output, high cutting speed • With integrated hand-safety, safety chain brake • Automatic chain lubrication • Possible motor speed regulation by lever • Simple to operate and maintain							
SH150-180BX	6061125A	1,5 (2.01)	18 000	350 (13.78)	340 (13.39) one side 690 (27.17) both sides	16 (.63)	7,6 (16.75)

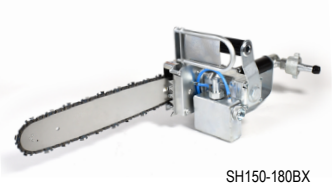
Operating pressure - NON EX-area: 90 psi (6,3 bar)
Operating pressure - EX-area: 58 psi (4 bar)

Advantages:

- for industrial applicatio
- highly durable
- high cutting speed
- robust
- user friendly and powe



PPP35AX



SH150-180BX

EXPLOSIVE ENVIRONMENT AIR TOOLS - ATEX-compliant

Impact tools - for the quick and low-fatigue tightening & loosening of screws from M10 to M36; these impact tools are specially well-suited for the tightening of screws in the assembly and maintenance sector, which may also be located in explosive hazardous environments

Model	Part No.	For screw	Max. torque capability Nm	Speed (no load) min^{-1} (rpm)	Impacts Hz	Square drive size in	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Impact tools - with pistolgrip - ATEX-compliant IM2cXII2GDcIICT6(80°C)X, without 3-step torque adjustment								
• Safety lever / trigger								
SMP026-1/2"ZEX	6061104A	M10 - M16	260	10 000	14	1/2"	10 (.39)	2,3 (5.07)

Impact tool - inline design with fistgrip - ATEX IM2cXII2GDcIIBT5(100°C)X, 3-step torque adjustment								
• Trigger								
• Maximum power - maximum efficiency - ideal for repetitive production e.g. in the automotive industry								
• The special robust construction of our impact tools assures a reliable operation in industrial areas with 24/7 operations.								
SMS265-1"ZAEX	6061222B	M24 - M45	2 650	6 000	13	1"	16 (.63)	15,2 (33.51)

Specifications at 90 psi (6,3 bar).

SMP026-1/2"ZEX

SMP110-3/4ZAEX

SMS210-1"XEX

SMS265-1"ZAEX

3-step torque adjustment	Our impact tools are equipped with a 3-level power limiter, where the first setting is the max. torque, the second setting reduces the torque to 50% and the third setting corresponds to 30% of the max. torque.

Rock drills - for manual drilling equipped with a drill bit (not supplied with the tool), for soft- and semisolid soil, slate, clay, or other soft rocks located in explosive hazardous environments

Model	Part No.	Power output W (hp)	Speed (no load) min^{-1} (rpm)	Max. Ø of the core drill mm (in)	Recommended Ø of core drill mm (in)	I.D. of air inlet hose mm (in)	I.D. of water inlet hose mm (in)	Weight without air connection kg (lbs)
Rock drill, right rotated - ATEX-compliant IM2cXII2GDcIICT6(80°C)X								
• Safety lever								
• The machine incorporates a central water-flush features that reduces the dust generation caused by drilling.								
DP220-011BXOEX	6061107A	2 200 (2.95)	1 100	42 (1.65)	38-42 (.50-1.65)	19 (.75)	6 (.24)	7,6 (16.75)
Rock drill, Wordwide First Turbine Drill for Potentially Explosive Environments - IM2cXII2GDcIICT6(80°C)XIM2c								
• Right rotated								
• Safety lever								
• This is a worldwide innovation where the first of our drills is equipped with a turbine drive. The drill does not require airline lubrication (oilfree!).								
• This tool outputs an enormous torque of 45 Nm (400 in.lbs.) at maximum power! The innovative regulator of this drill guarantees an extreme long lifespan. The total weight of the drill is only 8.7 kg (19 lbs.) and therefore the power-to-weight ratio is an advantage!								
DPT450-011BXOEX	6061253A	4,5 (6.00)	1 100	42 (1.65)	38-42 (.50-1.65)	19 (.75)	-	8,7 (19.18)

Specifications at 90 psi (6,3 bar).

DP220-011BXOEX

DPT450-011BXOEX

DEPRAG offers a straight saw of type SS 150-280BX and a chain saw of type SH150-180BX, which conform to the highest requirements for tools used in explosion hazardous environments; more information about our saws can be found on the page 31.

Advantages:

- ATEX-compliant
- can be used in a hazardous environment (explosion-proof area)
- enhanced safety features
- simple operation
- highly durable

OTHER AIR TOOL - Files, Air assembly tool, End-of Arm-Tooling for Grinding/Polishing

DEPRAG CZ a.s. offers specially adapted tools for your particular application.
Please contact our product specialists if you cannot find a suitable tool.

Air file - for deburring, filing, fine grinding and lapping; in mold making, fixture- and apparatus construction and in foundries; ideal for industrial and production filing applications on steel, aluminum, brass, wood and other materials.

FS905-630BY

Model	Part No.	Stroke speed (no load) min^{-1} (rpm)	Stroke length mm (in)	File shank size mm (in)	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Hand files						
• Fast, efficient filing, sanding and deburring tool - weight reduced by half for comfortable operation over long periods of time.						
• A simple and fast exchange of the file						
• DEPRAG offers as optional accessories 4 various files - rat tail file, triangular taper file, half round file, flat leaf file						
FS905-630BY	6061238A	6 300	9 (.35)	5 (.20)	6 (.24)	0,5 (1.10)
FS404-900BU	6061293A	9 000	4 (.16)	3 (.12)	6 (.24)	0,4 (.88)

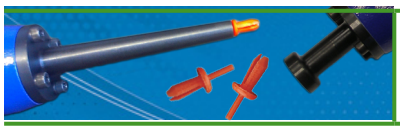
Specifications at 90 psi (6,3 bar).

Air assembly tool for mounting of plastic rivets - for mounting of plastic rivets in electrical engineering industry or for mounting of cable trays

WP361-045BZA-077/150

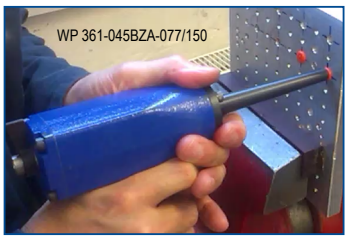
Model	Part No.	Diameter/Active length of plastic rivet mm (in)	Max. work stroke mm	Pressure force N	I.D. of air inlet hose mm (in)	Weight without air connection kg (lbs)
Air assembly tool for insertion of plastic rivets						
Applications: Assembly of cable trays, insertion of plastic rivets in electrical engineering industry, insertion of rivets in production of white goods etc. Air assembly tool is especially well-suited for the use in mass production, where an operator is exposed to sustained, long-lasting and monotonous handling. This air tool is designed to reduce your production efforts by greatly reducing cycle times. The assembly tool is specifically designed for the insertion of specific plastic connection rivets.						
WP361-045BZA-077/150	6061261A	7,7/15 (3.03/.59)	45 (1.77)	610	10 (.39)	1,2 (2.65)

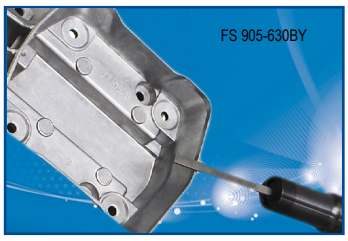
Specifications at 90 psi (6,3 bar).



Application-extension of this tool can be adjusted depending on the dimensions of plastic rivet.

Advantages:
- robust
- reliable
- highly durable
- simple operation





ACCESSORIES / MAINTENANCE & SERVICE FOR AIR TOOLS

Our service offering goes beyond the selection of a suitable tool. The performance and longevity of our tools also depends on using the correct air connections, air distribution throughout the facility and regular maintenance. The operator's comfort while using our tools is influenced by selecting the correct accessories. All this is a part of our product offering and technical consultation by a technical advisor.

Accessories for air tools

- **Collets, integrated sockets for impact tools, carbide burrs**
- **Inserting tools (chisels) for air hammers**
- **Maintenance units - combination filter / lubricator**
- **Balancers**
- **Polyurethan spiral hoses**
- **Quick connect couplers**
- **Air Plugs**
- **Hose nozzles**
- **Hose connectors**
- **Reducers**
- **Double-threaded connectors**
- **Flow distributors**
- **Lubrication oil**
- **Blow guns (pistolgrip)**
- **Power limeters**
- **Other accessories**

Maintenance & service of air tools DEPRAG INDUSTRIAL

- **Service and support**
- **Highest requirement for quality, precision and longevity**
- **Lowest cost for repairs compared to electric tools**
- **Shortest deliveries for repaired tools**

The air tools offered by DEPRAG INDUSTRIAL have some of the highest reputation on the market due to our never-ending technical developments that are important to keep the cost for maintenance and repair to the lowest possible level.

Our tools fulfill the highest requirements in regards to quality, precision and longevity.

DEPRAG has a full line of service and support offering.

We offer an individual training program, which is targeted to your particular application and the air tools you use. DEPRAG incorporates its own service center that includes a complete repair facility for all our products. An extensive inventory of spare parts guarantees a fast response capability.

Whether at your or at our facility; we will adapt our service to fit your needs.

ADVANTAGES OF INDUSTRIAL AIR TOOLS

The main advantage of the airmotor is its high performance density, which is only about 1/5th of the mass or 1/3rd of the size of an electric motor with a comparable performance. Due to this advantage, an air-motor is the preferred drive for power tools.

- **Power Characteristics**

The power output performance of the air-motor is virtually constant over broad speed ranges. It can also be operated in a wide field of alternating loads. The power output can be easily adjusted by changing the operating-pressure and the speed is perpetually variable by the reduction of the air volume.

- **Load Capacity**

The air-motor can easily be loaded to a full stand-still; it even tolerates a negative turn direction if the load is increased. The motor always reaches its full power output and there will be no damage to the motor!

- **Temperature behavior**

Expanding air cools the motor when the load is increased. Only when idling, a rise in temperature may occur. The motor is therefore temperature insensitive and overheating through over-load is practically impossible.

- **Exhaust**

The noise generated by the exhaust air is reduced by a specialized silencer. Additionally, the exhaust air is directed away from the operator through a coaxial pressure/exhaust-hose.

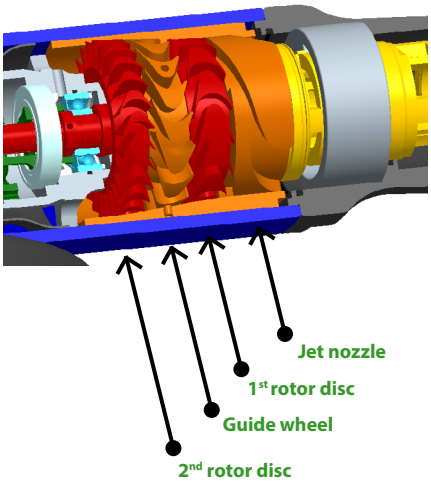
- **Vane Motor**

All vane motors essentially consist of the rotor, which circulates in an eccentrically offset perforation of the rotor cylinder. Because of this eccentrically offset perforation, the vanes form working chambers, the volume of which increase in the turn direction. Because of the expansion of the compressed supply air, the pressure energy is converted into kinetic energy and therefore results into the rotation of the rotor.

- **Turbine Motor**

Our turbine motors offer the ideal drive solution for high speed ranges. From turbine design and prototype production up to a series manufacturing, a tailor-made motor solution is available for your individual application.

Structure and function of the DEPRAG Turbine:
Conversion of pressure energy to kinetic energy in the jet nozzle. Most of the kinetic energy is transformed within the first rotor disc. The fixed guide wheel alters the air flow. The residual energy is transformed in the second rotor disc. The turbine is a turbo machine, which does not need tangential sealing. Turbine operates with oil-free air, therefore causes absolutely no wear. Turbo machines use pneumatic energy optimally, which reduces the air requirements to 1/3rd when compared with a standard vane motor. The performance-to-weight ratio (kg/kW) is only half as large.



AIR TOOLS VS ELECTRIC TOOLS - ADVANTAGES OF AIR TOOLS

Air tools vs electric tools - advantages air tools

- Optimum power-to-weight ratio
- Work in polluted environments (air tools are damp- and dust resistant)
- Robust - highly durable, suitable for the use under extreme operational conditions
- No electric shock risk
- High starting torque
- No overheating
- Overload safe
- Compact and light weight
- Easy to maintain

AIR TOOLS DEPRAG INDUSTRIAL - APPLICATIONS

DEPRAG CZ a.s. offers professional tools for almost any application case.

Applications:

- Foundries
- Off-shore industry
- Automotive industry
- Machine building
- Steel building
- Ship building
- Aircraft building
- Building industry
- Mining, quarries
- Sculpture and fabricating
- Household goods
- Maintenance and assembly departments

OPERATING CONDITIONS FOR THE USE OF AIR TOOLS

Operating conditions for the use of air tools

Before connecting the air supply line to the machine, clean the air pipe and the air hose by slightly blowing air into the pipe/hose; this will remove any dirt particles. Make sure to wear your safety googles! Verify that all air lines have a sufficient cross-section (as mentioned in technical specifications of our products) and that there are no throttled areas, bends or kinks. If the air supply line is longer than 2 meters, the next larger hose I.D. should be installed, to avoid a loss of power. Our tools should be operated with lubricated air only. Best results are achieved, when machine is lubricated with 1 – 2 drops of oil per 1m3. The air supply to the machine needs to be filtered. The maintenance unit, the valves and the silencers have to be selected according to the air consumption of the machine (mentioned in technical specifications of our products). Install components, which have a measurement that will limit the pressure drop – when measured from the maintenance unit to the machine – to less than 0.5 bar (7.25 PSI). Check flow-pressure directly on the machine. The pressure regulator needs to be adjusted to an airflow of (max.) 6.3 bar/90 PSI. A higher pressure leads to increased wear and tear. An air pressure below 6.3 bar reduces the power output and speed of the machine. It is necessary to ensure the quality of the compressed air at the required pressure, as well as the volume required for the respective air tools. When using oilfree air, a performance reduction occurs & maintenance requirements increase!

Connect the machine as follows:

- **For standard operation, connect to a maintenance unit consisting of filter with water separator, pressur regulator and oiler.**
- **The standard filter efficiency for maintenance units is 25 µm. If a higher air quality is required, please use a filter insert with a higher filter efficiency.**

With regard to air quality according to ISO 8573-1 we recommend:

	Class	Residual Dust		Residual Water		Residual Oil
		particle size µm	max. concentration mg/m³	max. concentration g/m³	pressure dew-point °C	content mg/m³
Lubricated air	-/4/4	25	10	6	+3	5
Oil-free air	6/3/3	5 *)	5	0,88	-20	1

*) Filter grade 8 µm is sufficient for DEPRAG machines which are operated oilfree.

- Check regularly that the (measured) speed of the machine is not higher than specified on its tag (or in our technical specifications). Do not exceed the maximum allowable operating speed.
- Never remove factory installed guards from tools and ensure they are in good condition and properly adjusted (inspect regularly). Guards need to be correctly aligned to deflect sparks and debris away from the operator.
- Check that only abrasive products as specified by the manufacturer are used and are in good condition. Never exceed the maximum allowed radial speed of the abrasive material. The abrasive product must be designed for your tool and it´s application.
- Ensure that the abrasive product dimensions are compatible with the machine and that the abrasive product fits the spindle. An unsuitable product can produce excessive debris, dust, vibration and noise. Prior to operating the tool, make sure that the abrasive product is securely clamped.
- Verify that the abrasive product is not wobbling or loose prior to starting tool operation. Carefully idle the machine without applying any load.
- Always wear impact-resistant safety goggles, hearing protection, safety gloves and personal protective clothing - such as an apron and helmet.
- Schedule regular maintenance for your tools & the air supply with all its connections - coordinate your maintenance by considering the level of usage of your tools and the application where your tool is used.

RULES OF CONNECTING AIR TOOLS TO AN AIR DISTRIBUTION GRID

Rules of connecting air tools to an air distribution grid

- The compressed air entering the tool must be dry and clean
- Vane motors must be oiled, using a special air lubrication oil (see DEPRAG oil)
- Tooth- and turbine motors do not use air-line lubrication
- Tools should be used with maintenance units, consisting of filter, oiler and regulator
- Correctly choose a maintenance to ensure sufficient air flow
- The maintenance unit should be visibly installed for easy verification of the oil level and its overall functionability
- Use an air hose that has the correctly sized interior diameter (ID)
- Maximum recommended distance of a tool from its maintenance unit is 5 meters
  (use a hose with a larger ID for longer distances)

We offer a variety of air connection accessories. Our experienced sales staff can help you choose the correct connection to ensure the right performance of your DEPRAG tools. Please contact our product specialists!

TYPE KEY - PNEUMATIC TOOLS DEPRAG INDUSTRIAL

Type key - grinders / polishers

Grinders with Collet

GDST 070 - 153 B X F I H L

- Radial speed [m.s^{-1}]
- A, B, C, D = Innovational stage, E = Eccentric
- Max. diameter of grinding / polishing disk [mm]
- U = Angle
- S = Straight
- P = Geared
- PL = Pneumatic polisher

TYPE KEY - PNEUMATIC TOOLS DEPRAG INDUSTRIAL

Type key - drills / tappers / impact tools / saws / hammers / files / metal shears / needle scalers / pliers

Drills / Tappers

DS 020 - 060 B X P R F B10 Q EX

- EX-protection
- Q = Quick change chuck
- Drill bit clamping system:
- B10 - conical chuck B10
- 3/8“ - thread on chuck 3/8“UNF
- C - collet
- MK1 - MORSE taper
- F = Frontal exhaust (partial)
- R = Reversible
- P = Chuck or collet shield
- X = Safety lever
- Y = Twist valve
- Z = Trigger start
- P = Push to start
- B = Basic design
- S = Short design
- Speed x 100 [min^{-1}]; 060 = 6 000 min^{-1}
- Power output x 10 [W]; 020 = 200 W
- S = Straight
- P = Pistolgrip
- D = Drill / tapper

PV 6 A - B H

- H = Hose
- B = Basic design
- Innovational stage A, C, E
- Max. diameter of drill bit [mm]
- Pneumatic drill

Impact tools

S M P 030 - 1/2“Z A EX

- EX-protection
- A = Adjust limiter
- Z = Trigger start
- X = Safety lever
- Size spindle- 1“, 1/2“, ...
- Max. torque value x 10 [Nm]; 240 = 2 400 Nm
- P = Pistogrip
- S = Straight
- M = Mechanic
- S = Wrench

Saws - chain saw, jig saw

S H 150 - 180 B X

- X = Safety lever
- B = Basic design
- Chain saw: Speed x 100 [min^{-1}]; 180 = 18 000 min^{-1}
- Jig saw: Strokes per min. - no load [min^{-1}]
- Power output x 10 [W]; 150 = 1 500 W
- H = Chain saw
- S = Straight (Jig)
- S = Saw

P P P 35 A X

- X = Safety lever
- A = Version
- Max. length of saw blade x 10 [mm]; 350 mm
- P = Straight (Jig)
- P = Saw
- P = Pneumatic

Hammers

HCD 140 - R14 V

- B = Basic design
- V = Low vibrations
- D =Fist grip
- P = Pistolgrip
- Type of shank for tools, R = Round-shaft, HR-round hex.shaft
- Weight 140 = 140/10 = 14 kg
- HC = Chipping / Riventing hammer
- HCD = Riveting hammer
- HB = Spade hammer
- HP = Pick hammer
- HR = Impact hammer
- HS = Scraper

Files

FS 9 05 - 630 B Y

- Y = Twist valve
- B = Basic design
- Stroke speed x 10 [min^{-1}]; 630 = 6 300 min^{-1}
- Weight 05 = 05/10 = 0,5 kg
- Stroke length, 9 mm
- S = Straight
- F = File

Needle scalers

S N 10

- Weight 10 = 10/10 = 1,0 kg (1,4 kg)
- N = Needle
- S = Scaler

Pliers

P0 38 3 X - P 00 - I 00 CL 10

- Width of clamp: 6=5,5 mm, 08=7,5 mm, 10=10 mm
- Clamps: CL = CLIC clamps
  CO = COBRA clamps
  FE = Spring clamps
  R = Hose clamps
- Inserts-angle: 00 = without angle, 90 = angle 90°
- I = Insert type
- Head angle: 00 = without angle
- Inserts: C = Cutting, S = Squeeze P = Press
- X = Safety lever
- Z = Trigger start
- 3 = Piston number
- Cylinder diameter [mm]; 38 mm
- P = Pliers (0 = Basic, 1 = Another version)

Metal shears

S 16 - 320 Y

- X = Safety lever
- Y = Twist valve
- Impacts at full load x 10 [min^{-1}]; 320 = 3 200 min^{-1}
- Max. metal thickness up to 400 N/mm^2 /10 [mm]; 16 = 1,6 mm
- S = Shears
